

Mathematical Biosciences

an international journal

Volume 153

S.J. Cox, A new method for extracting cable parameters from input impedance data	1
V. Skakauskas, Product solutions and asymptotic behaviour of sex-age-dependent populations with random mating and females' pregnancy	13
R. Thomson, Ages of mutations on a coalescent tree	41
Y. Kim, Mechanisms of symptom in Bartoszyński's virus model	63
S.M. Stringer, N. Hunter and M.E.J. Woolhouse, A mathematical model of the dynamics of scrapie in a sheep flock	79
B.W. Kooi, M.P. Boer and S.A.L.M. Kooijman, Consequences of population models for the dynamics of food chains	99
M.R. Owen and J.A. Sherratt, Mathematical modelling of juxtacrine cell signalling	125
J.D.H. Smith, Demography and the canonical ensemble	151
